

Sr. Healthcare Economics Analyst – UnitedHealthcare Community & State – Elkridge, MD

The Sr. Healthcare Economics Analyst will provide information in support of financial and utilization analysis through the analysis of claims data while identifying potential areas for risk revenue.

Primary job responsibilities:

- Create analytic datasets from different data sources, such as flat files and relational databases
- Conduct healthcare data validation and analysis
- Generate routine and ad-hoc reports
- Handle multiple projects with similar timelines
- Support the development of risk adjustment analysis, forecasting, and general healthcare research

Qualifications

Required:

- Bachelor's degree or equivalent experience
- 2+ years healthcare data analysis experience
- Minimum of 1 year of SAS programming experience
- Proficient with MS Excel and Access
- Self-motivated, attention to detail, and willing to learn
- Ability to work and contribute in a team environment
- Ability to work in a fast paced, ever-changing environment
- Ability to handle multiple projects
- Other duties as assigned

Preferred:

- Medical claims analysis or strong knowledge of how claims are billed and adjudicated
- Experience with SQL

If you meet the above listed qualifications, as well as are able to permanently work in the U.S. for any employer without restrictions, please send your resume to kelly_ackerman@uhc.com with “Job # 371549” in the subject line. No third party contacts please.
